²The performance of the Steadyhand Balanced Income Portfolio (Hypothetical) assumes that it is rebalanced on a quarterly basis to the target fund allocation. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.
