

Steadyhand Founders Fund

As of December 31, 2021

Steadyhand

Objective

To provide a combination of capital growth and income through investing in a diversified collection of Canadian and foreign stocks, bonds and money market securities.

Is This Fund Suitable for You?

You have a medium to long-term investment time horizon and a medium risk tolerance. Consider this fund if you are seeking a balanced portfolio of stocks and fixed income securities and the oversight of an industry veteran (Tom Bradley) to make asset allocation decisions.

Strategy

To achieve its objective, the fund invests in Steadyhand's income and equity funds. The underlying fund mix will be a reflection of Tom Bradley's views on market valuations and asset mix. The portfolio has a long-term targeted mix of 60% equities and 40% fixed income, but the equity portion may range from 40% to 75% and fixed income from 25% to 60%. The manager will make tactical shifts in the fund's asset mix when he feels that stock or bond valuations are at an extreme.

See reverse for disclaimer.

Steadyhand Investment Management Ltd. is the manager to the Steadyhand Founders Fund. Commissions, trailing commissions, management fees and expenses may all be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution of optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

All posted returns assume an investment amount of \$10,000.
